Subject Re: Plover Work

Here are some reports from the past that might help. As the population of the prairie dog declined, so did our survey efforts. We still plan to survey every burn in shortgrass and some random, active prairie dog colonies as funding and labor allow. Hope it helps and let me know if I need to send you anything else.
Thank, steph

Subject Plover Work

Stephanie. Our Ecological Services office is looking for information Mountain Plover work particularly looking at trends, or use patterns. I know D. Augustine had done some work and I wasn't sure if you guys had continued or pursued other research. Peter Plage had mentioned that there's a PHD researcher Dave Wiggins who was pursuing or doing work in conjunction with the

Comanche.

SO I guess I was just serving as a conduit to to let you know they are seeking info and to relay what you might be working on.

Thanks.

Katy
